SUMMER INTERNSHIP / WORK EXPERIENCE

Team Lead, Viral Fission   Mar 2022 - Present

Product Development Engineer, HighRadius   Jan 2022 - Apr 2022
- As a winter internship project, I built a web application to help the people working in the Accounts Receivable departments in their day-to-day activities.
- I built a Full-stack Invoice Management Application using Reacts, JDBC, Java, Servlets.
- Build a responsive Receivables Dashboard.

Frontend Developer, BizDateUp   Jul 2021 - Nov 2021
- I Design and implement web applications, prototypes, interfaces, and also websites for clients.
- Convert as well as integrate data plus content for use in database websites.
- Make suggestions that improve Programming techniques, applications client deliverables.

Campus Ambassador, Viral Fission   Jun 2021 - Mar 2022
Viral Fission is a platform that bridges the gap between India's most capable youth and the brands they love, through engagements and experiences.

Branding Consultant, ArtAgile Solutions Pvt LTD   Dec 2019 - Mar 2021
Company focuses on Professional brand builder and accountable for building creative graphics that enhanced and up-lifted the client's face value in the market. Creating a brand identity and guidelines for multiple start-ups, also did videos & animation materials for SEO projects, professional photography for e-commerce, real estate, and corporate projects.

Marketing, Dhobi G   Aug 2019 - Oct 2019
Dhobi G provide customer services such as laundry order booking management system and delivery services. They operate a fleet of delivery personnel who pick-up orders from customers, deliver it to the laundry & dry cleaning service providers and vice-versa. I Collaborated with team members to help expand marketing channels.

PROJECTS

ACCIDENT DETECTION AND PREVENTION SYSTEM WITH USE OF IOT - IOT   Jan 2022 - Apr 2022
- An IoT system is devised which monitors the speed of the vehicle and alerts if the vehicle is above speed limits.
- This device uses GPS to determine the speed limit in a given location for the vehicle.
- In case a collision is imminent, it is immediately detected and a signal is sent to emergency and rescue with the details of the location and fastest route to the location.
- An app is developed which responds to the accident detector where any important details such as severity of the accident, medical condition of the victims etc, can be updated for which emergency and rescue could make preparations for.

SMART HOME AUTOMATION FOR ELDERLY ASSISTANCE USING GESTURE-CONTROL - IOT   Jul 2021 - Nov 2021
- The main objective of this project is to build smart homes which gives an incredible advantage for the elderly and disabled.
- The interfaced system is as simple as possible so that it makes physically impaired people use it more efficiently.
- This system is implemented by using sensors and WIFI mode of transmission.
- A novel behavior detection process based on the observed sensor data in performing essential daily activities.
